Connect law enforcement data in a secure cloud

Law Enforcement Message Switch

Empowering law enforcement

Your team needs answers fast. The Unisys Law Enforcement Message Switch/Justice Exchange (LEMS/JX™) connects them to FBI databases, state records and local systems through one intelligent hub.

Unisys designed LEMS/JX specifically for law enforcement and criminal justice professionals like you. The solution simplifies access to disparate data from various international, federal, state and local government sources in a Criminal Justice Information Services (CJIS) cloud environment.

LEMS/JX meets government agency needs for a proven, reliable and secure message switch that complies with the unique requirements of criminal justice organizations. LEMS/JX is an open architecture solution that adapts to your agency's specific requirements and provides the following key capabilities:

- Allows users to access and manage information in federal, state and local criminal justice information systems
- Connects disparate data sets using asynchronous messaging in the format native to each information system
- Supports a wide variety of message protocols using powerful, configurable and flexible processing and interface capabilities
- Provides guaranteed message delivery with high availability and fast performance using message store and forward capabilities
- Acts as the control terminal and complete audit point for systems such as the National Crime Information Center (NCIC) and the International Justice and Public Safety Network (NIets)
- Supports the latest information sharing technologies and standards, including the National Information Exchange Model (NIEM)
- Installs on premises in a Unisys data center or in a secure government CJIS cloud

Comprehensive access to law enforcement and public safety data

LEMS/JX provides access to hundreds of different sources including:

- FBI National Crime Information Center
- Nlets, the international justice and public safety information sharing network
- National Weather Service
- Division of Motor Vehicles
- Computerized Criminal History database
- State hot files
- Firearms databases
- Sexual offender registries
- Background check systems
- Regionalized justice information sharing systems

Why Unisys?

We've spent decades working alongside law enforcement, understanding how split-second decisions depend on complete information. We combine AI innovation, cloud capabilities and digital workplace and cybersecurity expertise to deliver secure, efficient operations and solutions that enhance constituent service and employee productivity.
