

# Manage your entire digital workplace

## Unisys Unified Endpoint Management

### Highlights

Device provisioning, enrollment and life cycle engagement

AI-driven troubleshooting and automation

Remote OS for over-the-air provisioning in regulated environments

Modern collaboration enablement on Microsoft Teams and Copilot

Monitoring and troubleshooting of smart meeting rooms, signage, kiosks and IoT devices

Real-time threat detection and ransomware prevention

Optimization of room bookings, occupancy sensors and smart building analytics

Geofencing and asset tracking for full device and compliance visibility

Persona-based provisioning for desk, hybrid and frontline environments

As your organization grows, to stay productive, your employees' needs for reliable, secure digital assets grow too. Effective endpoint management optimizes your asset fleet and detects unmanaged, unknown and unauthorized usage. This makes it easier to resolve shadow IT instances and decrease costly device replacement, field maintenance and digital purchases gathering dust in stockrooms.

Unified Endpoint Management helps you unify your digital workplace, including devices, device operating systems, productivity/communication/collaboration apps, smart meeting rooms and intelligent building systems. It covers laptops, tablets, smartphones, thin clients, kiosks, digital signage, meeting room devices, building IoT devices, virtual desktops and rugged frontline options.

This solution streamlines asset modernization and migration, prioritizes frontline and hybrid worker enablement, enhances the employee experience and aligns digital and physical endpoints with business objectives.

### Deliver asset consistency

Give employees consistency across devices, apps and workplaces by unifying management under one framework, reducing IT complexity and costs.

## How you benefit

- **Increased employee productivity:** Give your factory, airline, pipeline and field workers access to persona-based, rugged devices, kiosks, tablets and headsets. A modern digital workplace and applications such as Microsoft Teams and Copilot increase employee satisfaction, allowing them to complete role-specific tasks without barriers and delivering a better experience for joiners, leavers and hybrid workers.
- **Corporate communications:** Support corporate communication on all devices, no matter where a device is located, with consistent messaging that engages employees and gives them a sense of belonging.
- **Usage visibility:** Monitor device and IT asset usage through dashboards and reporting to detect patterns and recurring issues through advanced analytics. This helps you ensure every employee has the necessary digital tools to succeed at their jobs and address the shadow IT problem by identifying rogue assets.
- **Security and compliance optimization:** Strengthen your security posture with geofencing, AI-powered detection, Zero Trust capabilities, antivirus agents and hard disk drive encryption. Application-based behavioral analysis and AI-powered data crowdsourcing identify threats, while secure provisioning options like RemoteOS ready your organization for audits and improve regulatory compliance.
- **Cost savings:** Decrease facility costs and operational expenses with occupancy insights and Unisys' scalability, standards, processes and PC lifestyle management, freeing up resources for strategic priorities. Efficient device life cycle management, including sustainable PC refresh strategies, reduces replacement, servicing and storage costs. Centralized device and app management streamlines operations for greater overall efficiency.
- **Remote management:** Gain the agility to scale resources to meet changing business requirements and employee needs with remote troubleshooting of devices and rooms.

## Enhance the employee experience

Give employees flexible access, device choice, automated processes and the ability to work from anywhere, increasing satisfaction and productivity.

## Why Unisys?

Unisys brings decades of expertise in aligning digital workforce solutions to business outcomes that advance modern workplaces and employee experiences. We take a persona-based approach, supporting desk, hybrid and frontline workers with tailored experiences, and our consultative, end-to-end delivery model ensures flexibility. Our delivery expertise in highly regulated environments means we prioritize security and compliance. We partner with the best in the field, including Microsoft, Dell, Lenovo and Appspace, to optimize your workforce environment for a competitive advantage.
